

# Swarm collection

Our members provide a swarm collection service voluntarily and may have to fit collections around their day jobs. Please supply the area post code where the swarm has been seen and a brief site description.

We may not be able to collect some swarms as this depends on their location, roofs and other inaccessible areas for example.

There is no charge for this service for this year, however, you may wish to make a £25 donation to Cirencester and District Beekeepers. For this we would be extremely grateful as it will allow us to fund our education and training programme for new beekeepers.
